

Oculomotor Technologies, Inc.

New Jersey Health Foundation through Foundation Venture Capital Group is excited to announce the first investment in a company formed by researchers at New Jersey Institute of Technology. John Vito d'Antonio Bertagnoli, Chang Yaramothu, Tara Alvarez and Mitchell Scheiman form a multi-disciplinary team and are the founders of Oculomotor Technologies (OMT).

The mission of OMT is to combine virtual reality based vision therapy with on board eye tracking to provide therapeutic effect to patients suffering from convergence insufficiency and other binocular vision dysfunctions.
